WORK

QSpiders

March 2022 – July 2022 | Position: Web Developer | Location: Bangalore

- During the internship, I created a Full Stack Blog website and integrated a Secure Authentication system that adhered to industry standards.
- I was also tasked with writing API endpoints for authentication, validation, and blog creation, as well as developing a React component for rendering blogs.
- The blog website was built using Node.js, Express, React.js, and MongoDB.

Freelancing

June 2023 - Present | Position: Web Developer | Location: Remote

- Designed a secure Todo application with support for multiple users and strong authentication measures.
- Built a recipe application that takes ingredients and suggests possible cooking recipes to the user.
- Engineered a real-time notification system to monitor stock price fluctuations and deliver pertinent news articles.

EDUCATION

Ballari Institute of Technology and Management

June 2018 - September 2022, Degree: Bachelor's in Computer Science

Successfully obtained a Bachelor's Degree in computer science and engineering, achieving an impressive **CGPA of 7.84 out of 10**.

PROJECTS

Real-time face identification :

- Developed utilizing Python Flask and Convolutional Neural Networks to identify student faces and record attendance in real-time accurately.

Currency Wallet :

- Created a web-based platform that functions similarly to Paytm, enabling users to store and transfer funds to their contacts securely.

Course Selling App :

- Developed a course marketplace application, inspired by Udemy, that facilitates the purchase of courses by users and enables instructors to sell their courses.

SKILLS & INTERESTS

- **Skills:** TypeScript, Node, Express, React, Tailwind CSS, Postgres (SQL), MongoDB(NoSQL).
- **Interests:** Traveling, Bike Riding, Ricing Linux
